

Rigging form Expo Greater Amsterdam

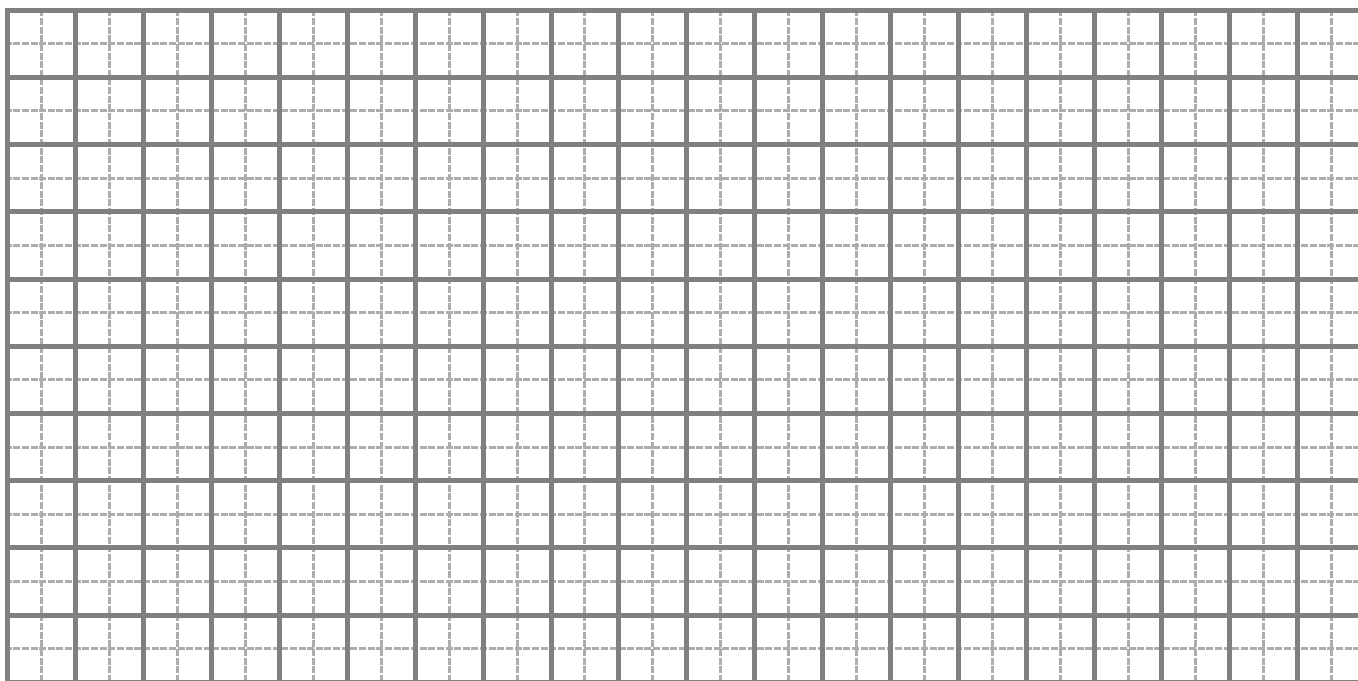

Situation Sketch

All drawings need to be situated/rotated as in our viewpoint above!

Please draw as accurate as possible the outside walls / boundaries of your stand and the (general) shape of the construction to be hung and mark the rigging/hang points as shown below the grid and note the weight per point. Make sure it's clear and understandable and supply us with enough measurements.

Adjacent Booth#: _____

= 1 X 1 METER

Adjacent Booth#: _____

X = Riggingpoint
